RX frequency coverage expansion

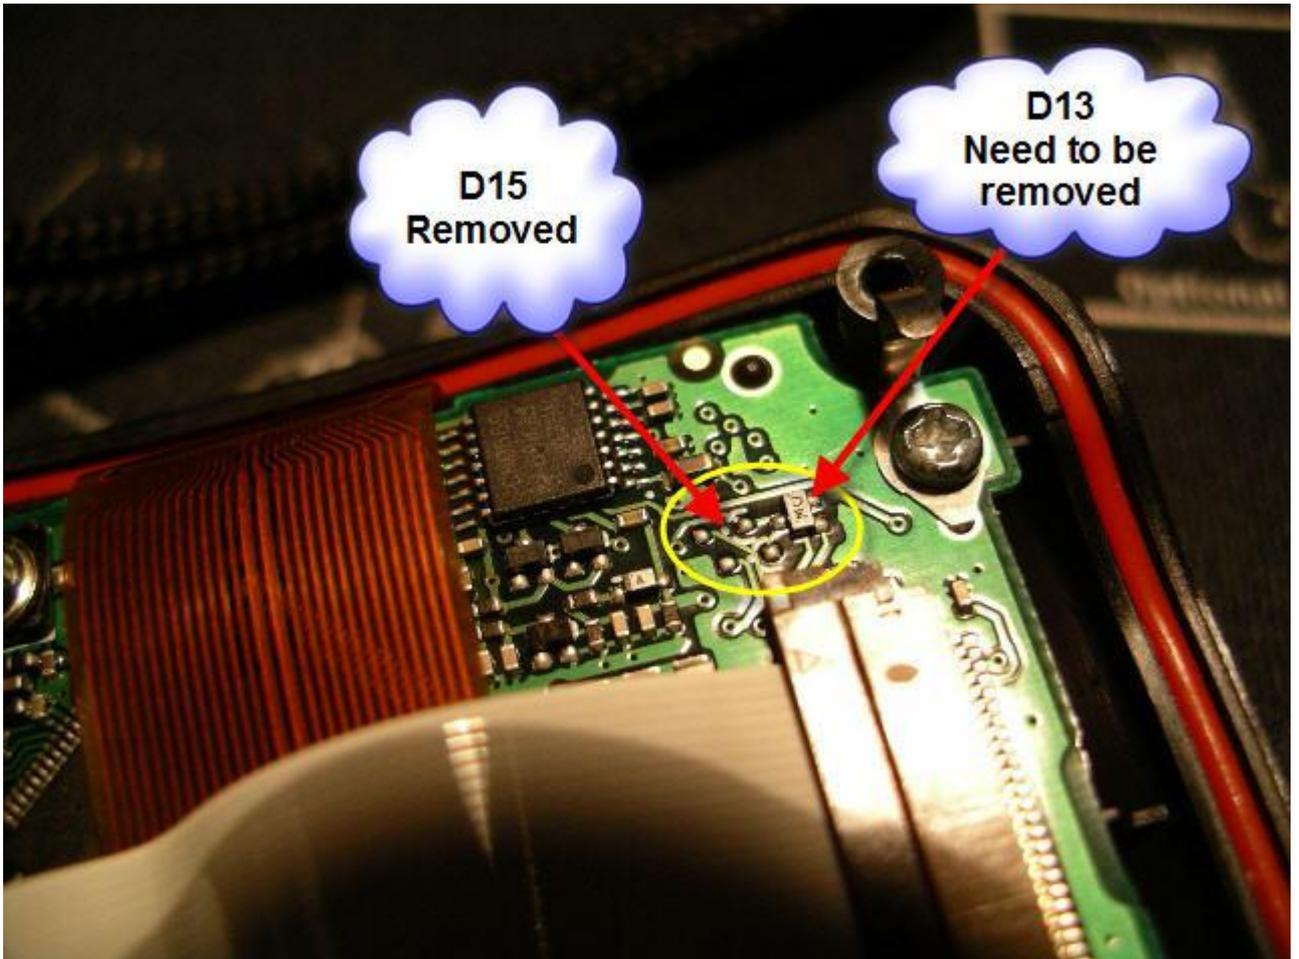

Remove D15 as shown below. While pushing [SQL] and [BAND], turn power on for Maximum frequency coverage.

TX frequency coverage expansion

After the RX frequency coverage expansion, remove D13 as shown below.

See picture:

The "TX/RX Frequency of IC91/IC-E91" modification works!

Your radio will become an "Export" model with the above modification.

Tx: 137-174Mhz, 420-450Mhz - Both A & B Band

Rx: A Band, 0.495-999.990Mhz

Rx: B Band 118-174Mhz, 350-470Mhz

As U can see, no difference in the Rx mod for the IC-E91.
